

Safeguard Your Users, Applications, and Infrastructure with Juniper + Corero Joint DDoS Protection Solution

The world has become smart—and so have DDoS attacks. Their increased sophistication, magnitude, and frequency, together with the advent of 5G and IoT, makes protecting against them a daily challenge. It's time to stay ahead with a smarter solution.

How does it work?

By simply adding the Juniper + Corero Joint DDoS Protection Solution (SmartWall Threat Defense Director) that works perfectly with your existing MX Series Platforms, you can:

MODERNIZE

Move at the high-speed you desire, with line-rate mitigation at the network edge that scales from 100GB to 40TB, without compromising on any performance.

MITIGATE

Defend your network against volumetric DDoS attacks, using real-time detection with packet-level visibility and machine-learning algorithms.

MONETIZE

Grow revenue by monetizing DDoS protection as a service to your customers, with comprehensive per-tenant visibility via a self-service portal.
